

Scrabble Validation!

Validation use cases

A Scrabble board is valid if it is not invalid.

Therefore, just have to come up with rules about when a Scrabble board is invalid and check for all those rules.

Brainstorm: invalid Scrabble boards

When is a Scrabble board invalid?

(You could look at `classresources/samples.py` if you need some examples.)

Invalid Scrabble Cases

- Invalid words ("egspfent" or "x")
- Words not touching other words

How to find invalid words?

What does it mean for a word to be invalid?

How do you find words?
